

# Matter in the Neutral Zone<sup>C-R</sup> of a Black-Hole<sup>C-R</sup>

The matter trapped in the Neutral Zone<sup>C-R</sup> residing just inside the Black-Hole<sup>C-R</sup> ignores the further influence of gravity.

Any mass trapped within this Neutral Zone<sup>C-R</sup> has already surrendered 100% of it's real-time identity to gravity. Any mass in the Neutral Zone<sup>C-R</sup> is to mass on our earth as ice at absolute zero -(at the lowest possible energy level) is to warm water.

Since the effect of gravity cannot decrease real-time below 0%, the matter cannot collapse inward into the Active Zone<sup>C-R</sup> or accelerate any more. To be simple, gravity loses it's "handles" to grab (influence or move) matter.

This is why the C-R theory has termed this zone the Neutral Zone<sup>C-R</sup>.

Photons too: Curvature has already "turned-off" all the real-time activity. With the escape velocity *above* the speed of light, photons of energy are "bound-up" or confined. Photons still exist, but they are time-trapped and are "self-reflecting" within a "well-like" dimension, physically isolated from influencing everything else.

Let us study the quotes below about the thoughts from matter now trapped within the Neutral Zone<sup>C-R</sup>:
